

BONAS MACFARLANE

CRADLE TO CAREER

Bonas MacFarlane has been helping children since 1992. Pioneers in supplementary education, the success of our integrated, one-to-one approach has been widely acclaimed and emulated.

Preparation

In depth assessments measure attainment against admission criteria to top independent schools. Identifying the most confident way each student learns, we then recommend suitable schools.

We use professional, thoroughly vetted tutors. Working in homes or via our online platform, they help children succeed at all ability levels - from top scholarships to SEN.

Our mentors develop academic skills, motivation, wellbeing and co-curricular participation. Mentors visit children at school, communicate online and participate in Camp Bonas rural summer courses that promote creativity and self-reliance.

Placement

Our school and university advisors have unparalleled relationships with the world's leading schools, universities and colleges. Our large support team in Chelsea manages the whole, complex admissions process. The team's management of placements is described as 'breathtakingly comprehensive' by *The Evening Standard*.

University

We have been preparing students for Oxbridge and all the leading British universities for over 25 years, and were a pioneer of Ivy League American College counselling in the UK. Our arts school preparation is also unique and highly successful. Our University Preparation Programme produces remarkable Oxbridge successes, particularly for the 'widening participation' students we sponsor annually.
